Zylo Business SIM

Your business identity, always visible

When someone calls your business number, your verified business name will be shown, even when the number is parked.

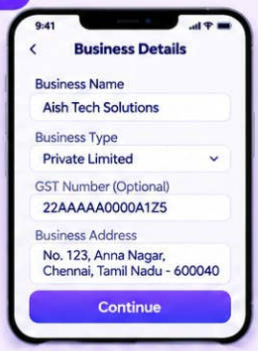

Key Benefits

- Business name shown on incoming calls
- Document based verification
- Park for 15 or 30 days
- Extend up to 2 times
- Build trust and brand recognition

1 Business SIM Onboarding Flow

Select Business SIM
Choose Business SIM and continue.

Enter Business Details
Provide your business information.

Upload Documents
Submit required business documents.

Verification Complete
You can now park your business number.

2 Business Name Shown on Incoming Calls

Show your business identity!

Example Business Details on Call Screen

Aish Tech Solutions
IT Services & Software Development

Business Name	:	Aish Tech Solutions
Business Type	:	Private Limited
GST Number	:	22AAAAA4000A125
Location	:	Chennai, Tamil Nadu

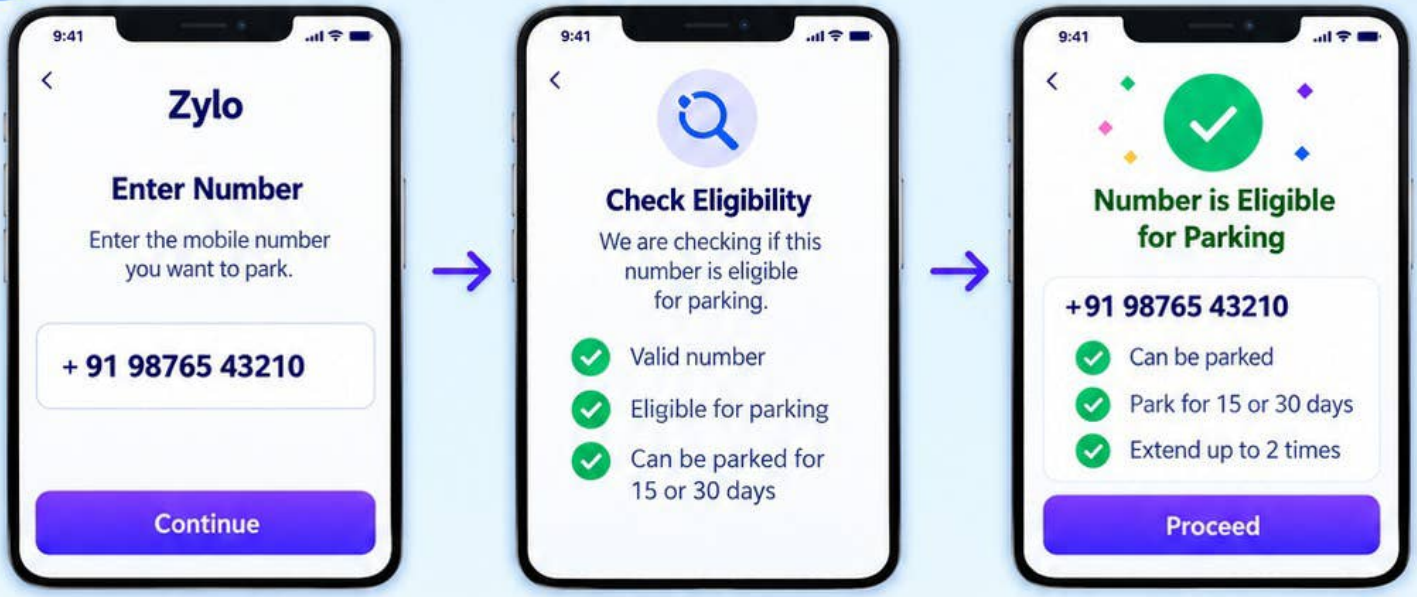

Zylo Number Parking

Park your number when not in use • Valid for 15 or 30 days • Extend up to 2 times

Works for both

- **Normal SIM** — For personal use
- **Business SIM** — For business use

1 Validate Number for Parking (Common for Both)

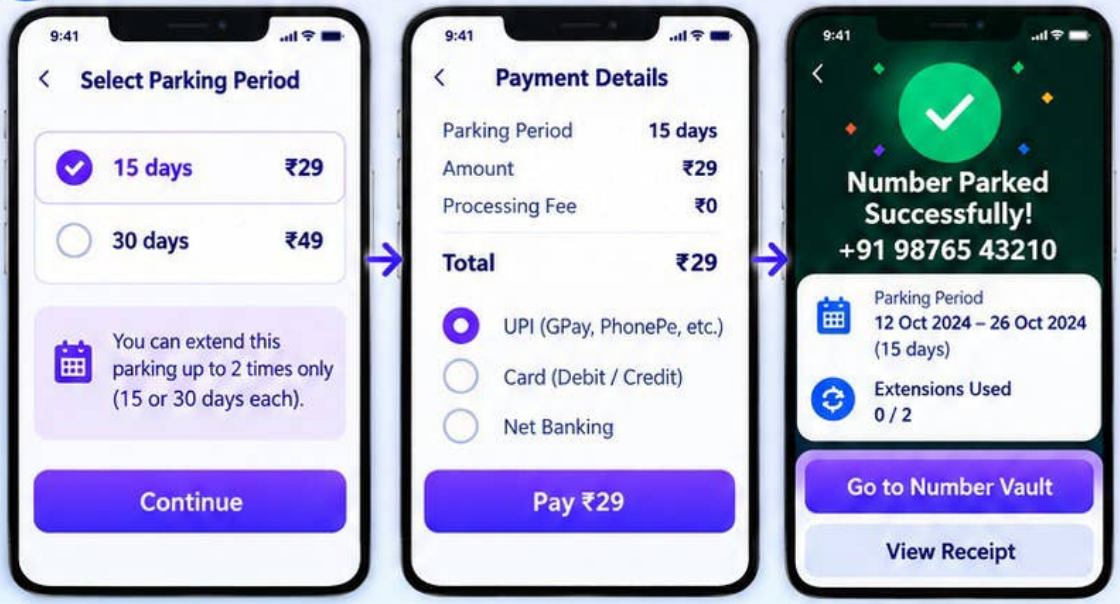

Enter Number
Enter the number you want to park.

Validate Number
System checks if the number is eligible for parking.

Validation Successful
You can now select a parking period.

2 Choose Parking Period & Make Payment (Common for Both)

Choose Period
Select 15 days or 30 days for initial parking.

Make Payment
Complete the payment to park the number.

Parking Confirmed
Your number is now parked.

Extension Rules (For Both SIM Types)

- Initial parking: 15 or 30 days
- Can extend only 2 times
- Each extension can be 15 or 30 days
- After 2 extensions, no further extensions are allowed.

Manage in Number Vault

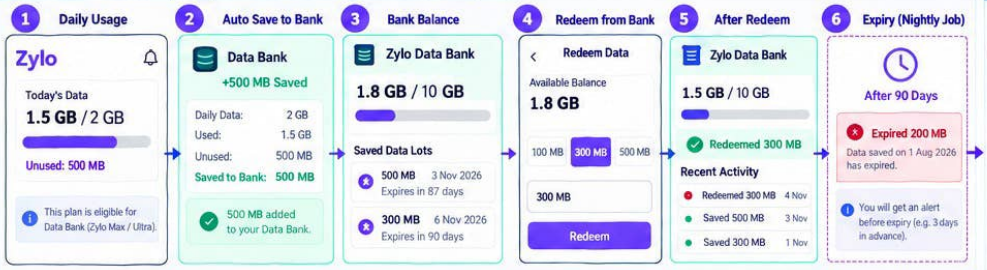

- View parking status
- Check expiry date and remaining days
- Extend (max 2 times)
- View payment history
- Reactivate when needed

Zylo — Data Bank & Data Transfer – Complete Flow & Architecture

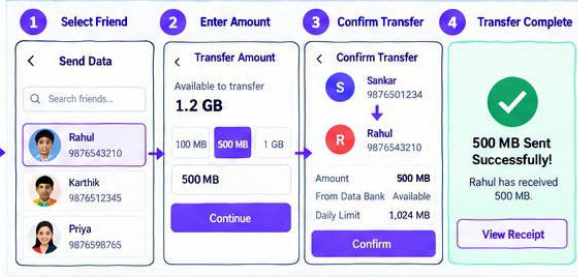

Save unused data, use it later, or share with friends. All data is simulated and does not affect real mobile networks.

Already in prototype (Frontend UI exists) | To be built (Backend logic & real data)

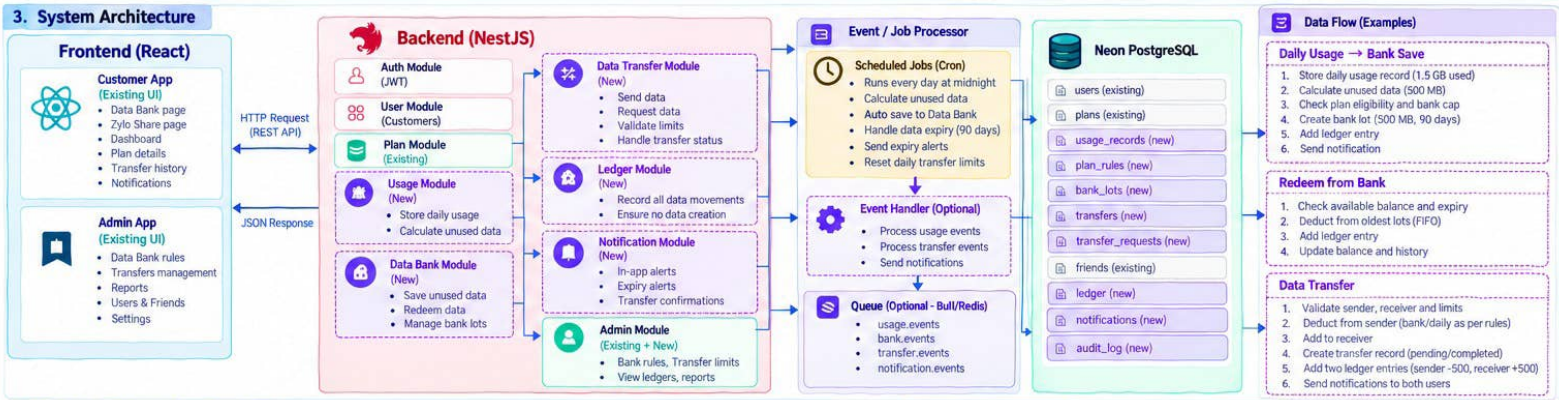

1. Data Bank Flow (Example: Sankar saves and later redeems data)

2. Data Transfer Flow (Example: Sankar sends 500 MB to Rahul)

3. System Architecture

4. Database Schema (Key Tables)

usage_records

id	uuid	PK
user_id	uuid	FK
plan_id	uuid	FK
usage_date	date	
data_allowed_mb	int	
data_used_mb	int	
data_unused_mb	int	
is_saved_to_bank	boolean	
created_at	timestamp	

plan_rules

id	uuid	PK
plan_id	uuid	FK
is_bank_eligible	boolean	
is_transfer_eligible	boolean	
bank_cap_mb	int (e.g. 10240)	
transfer_limit_mb	int (e.g. 1024)	
expiry_days	int (e.g. 90)	
min_transfer_mb	int	
max_transfer_mb	int	
updated_at	timestamp	

bank_lots

id	uuid	PK
user_id	uuid	FK
source	enum (daily, bonus)	
amount_mb	int	
available_mb	int	
created_at	timestamp	
expires_at	timestamp	
status	enum (active, expired)	

transfers

id	uuid	PK
from_user_id	uuid	FK
to_user_id	uuid	FK
amount_mb	int	
status	enum (pending, completed, failed)	
created_at	timestamp	
completed_at	timestamp	

transfer_requests

description	text	

notifications

id	uuid	PK
user_id	uuid	FK
type	enum (bank_save, expiry, transfer_sent, transfer_received, request, adjustment)	
title	text	
message	text	
is_read	boolean	
created_at	timestamp	

audit_log

id	uuid	PK
user_id	uuid	FK
action	text	
entity_type	text (bank, transfer, etc)	
entity_id	uuid	
details	jsonb	
created_at	timestamp	

friends

id	uuid	PK
user_id	uuid	FK
friend_id	uuid	FK
status	enum (pending, accepted)	
created_at	timestamp	

5. Business Rules

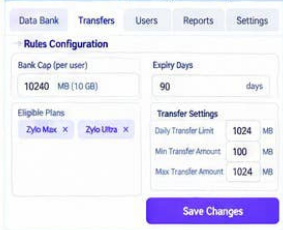

Data Bank Rules

- Only eligible plans (Zylo Max / Ultra)
- Save unused daily data automatically
- Bank cap: 10 GB (10,240 MB)
- Data expires after 90 days (FIFO)
- Redeem from oldest data first
- Show expiry alerts (e.g. 3 days before)
- All actions recorded in ledger
- No negative balance

Data Transfer Rules

- Both users must be Zylo customers
- Sender must have eligible transferable data
- Daily transfer limit (e.g. 1,024 MB)
- Min / Max per transfer (e.g. 100 MB – 1 GB)
- Cannot transfer to yourself
- Cannot create data (only existing balance)
- Transfer requests must be accepted
- All transfers recorded in ledger
- Abuse detection (unusual activity)

6. Admin Panel (Existing UI + New)

Zylo Data Quest – Complete Flow & Architecture

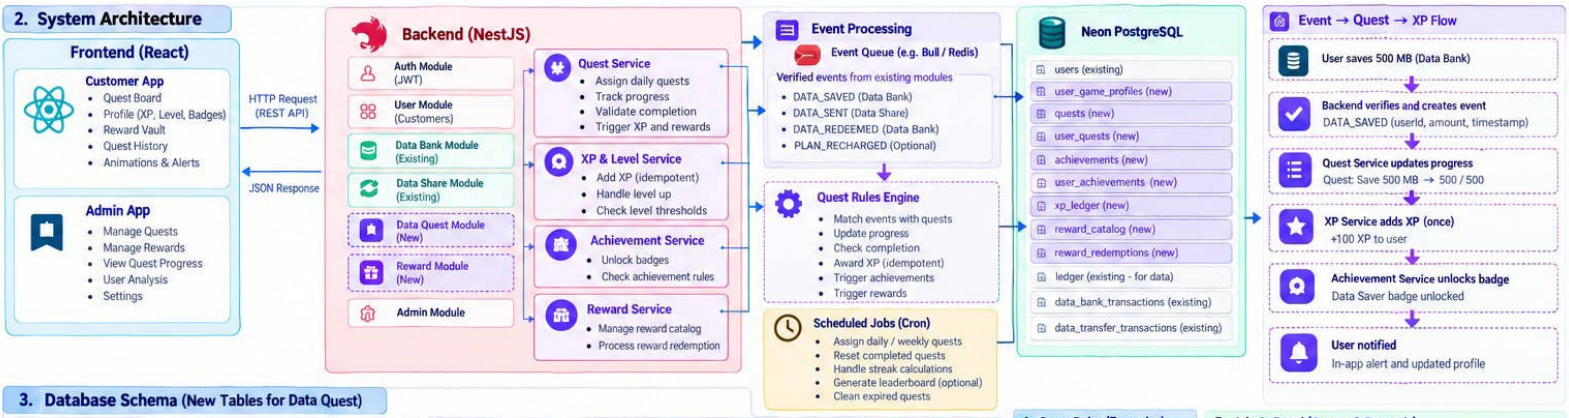

Turn your data usage into achievements. Complete quests, earn XP, unlock badges and get rewards!

Already in prototype (Existing feature) | To be built (Data Quest feature)

1. Customer Flow (Example: Sankar completes a quest)

2. System Architecture

3. Database Schema (New Tables for Data Quest)

user_game_profiles

id	uuid	PK
user_id	uuid	FK
level	int	
total_xp	int	
current_xp	int	
streak_days	int	
last_active_date	date	
created_at	timestamp	

quests

id	uuid	PK
title	text	
description	text	
type	enum (save, send, redeem etc)	
target_value	int	
xp_reward	int	
start_date	date	
end_date	date	
is_active	boolean	
created_at	timestamp	

user_quests

id	uuid	PK
user_id	uuid	FK
quest_id	uuid	FK
progress_value	int	
status	enum (active, completed, expired)	
assigned_date	date	
completed_date	date	
created_at	timestamp	
updated_at	timestamp	

achievements

id	uuid	PK
name	text	
description	text	
icon_url	text	
condition_type	text	
condition_value	int	
xp_reward	int	
is_hidden	boolean	
created_at	timestamp	

user_achievements

id	uuid	PK
user_id	uuid	FK
achievement_id	uuid	FK
unlocked_at	timestamp	

xp_ledger

id	uuid	PK
user_id	uuid	FK
source	enum (quest, achievement, bonus)	
source_id	uuid	
xp_amount	int	
description	text	
created_at	timestamp	

reward_catalog

id	uuid	PK
name	text	
type	enum (data, badge, title)	
value_mb	int (for data)	
required_xp	int	
is_active	boolean	
created_at	timestamp	

reward_redemptions

id	uuid	PK
user_id	uuid	FK
reward_id	uuid	FK
status	enum (pending, success, failed)	
redeemed_at	timestamp	
created_at	timestamp	

4. Quest Rules (Examples)

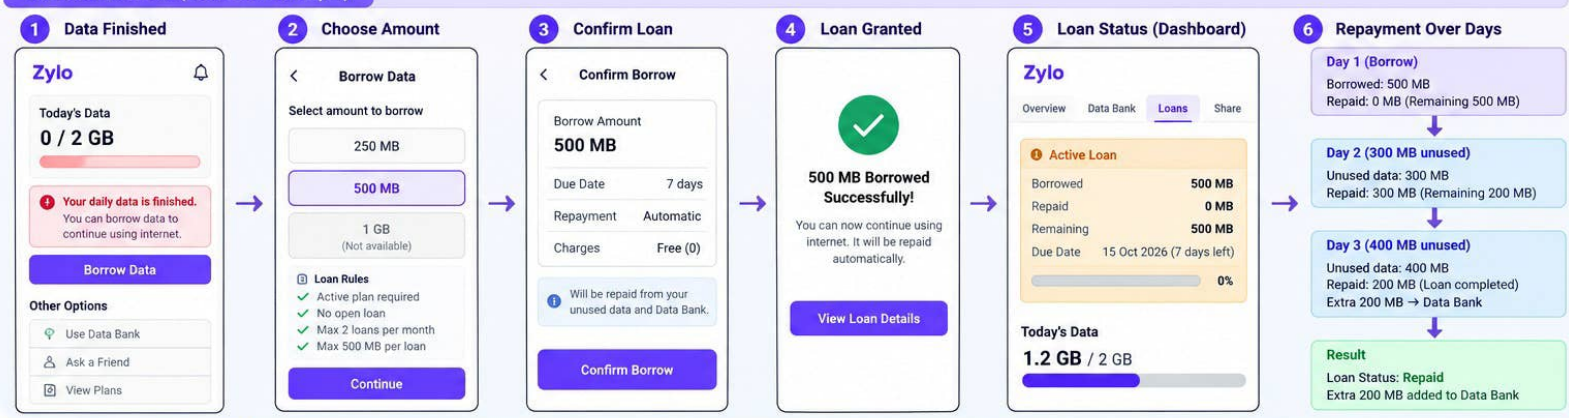

- XP is awarded only for verified backend events
- One quest has clear and measurable target
- Duplicate events are ignored (idempotent)
- XP is earned for behaviour, not for spending
- Daily / weekly quest limits per user
- Streaks for consistent activity
- Rewards can be data, badges or titles
- Abuse detection (unusual activity, bot usage)

5. Admin Panel (Quests & Rewards)

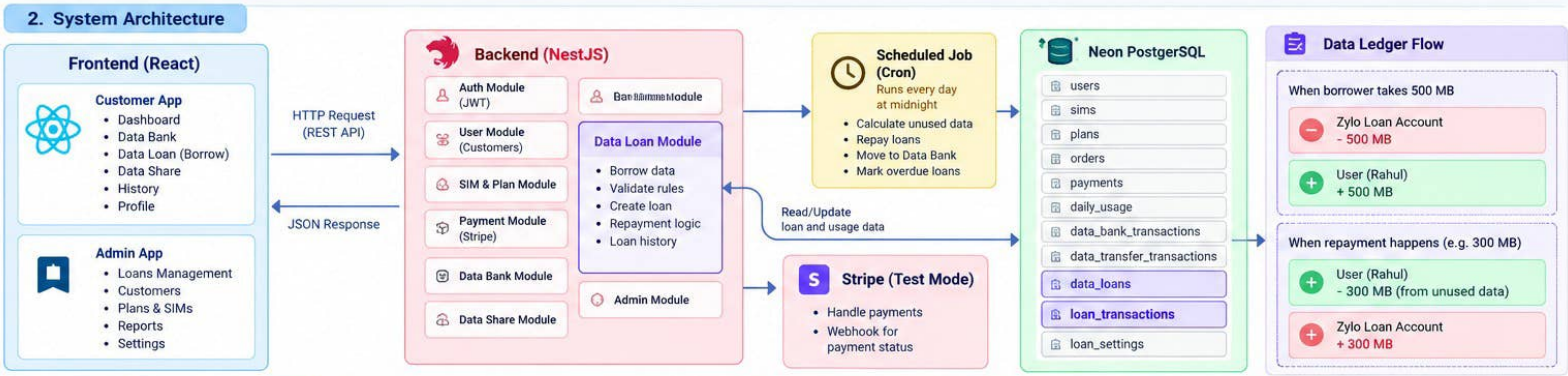

Quests | Rewards | Analytics — Create Quest

Title	Type	Target	XP	Start Date	End Date	Status	Actions
Save 500 MB	Data Bank	500 MB	100	26 Oct	-	Active	Edit
Send data to friend	Share	1 time	75	26 Oct	-	Active	Edit
Redeem saved data	Data Bank	1 time	50	26 Oct	-	Active	Edit
7 Day Streak	Streak	7 days	200	26 Oct	-	Active	Edit

1. Customer Flow (Data Loan Example)

2. System Architecture

3. Database Schema (Key Tables)

data_loans

id	uuid	PK
user_id	uuid	FK
plan_id	uuid	FK
borrowed_mb	int	
repaid_mb	int	
status	enum (active, repaid, overdue)	
created_at	timestamp	
due_date	timestamp	

loan_transactions

id	uuid	PK
loan_id	uuid	FK
type	enum (borrow, repay, adjust, overdue)	
amount_mb	int	
source	enum (user_unused, data_bank, system)	
description	text	
created_at	timestamp	

loan_settings

id	uuid	PK
max_borrow_mb	int	default 500
max_loans_per_month	int	default 2
repayment_days	int	default 7
created_at	timestamp	
updated_at	timestamp	

4. Loan Rules (Validation)

- User must have an active plan
- No other open loan
- Maximum 2 loans per month
- Maximum 500 MB per loan
- User cannot borrow if plan expired
- If rules fail, show clear error message (e.g. "You already have an open loan")

5. Admin View (Loans Management)

Zylo Travel Connect

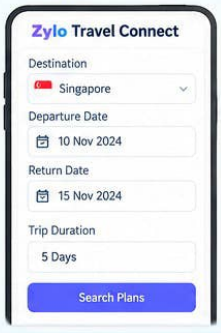

Buy → Install → Travel → Connect Automatically (or Manually)

Stay Connected **Anywhere in the World**

Travel eSIM · Keep Your Number · Automatic Switch · Global Coverage

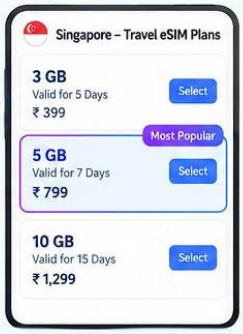

1 Plan Your Trip

Select your destination and travel dates.

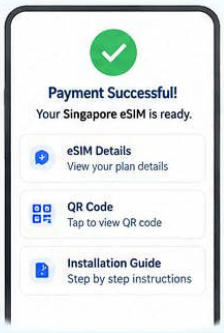

2 Choose a Package

Compare available travel eSIM plans.

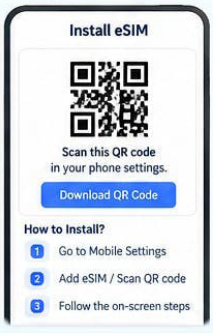

3 Purchase & Receive eSIM

Complete payment and get eSIM details.

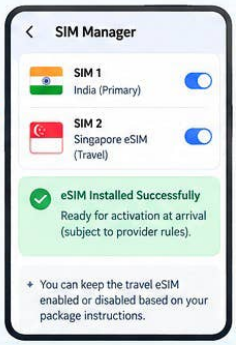

4 Install eSIM (Before Travel)

Install the eSIM using Wi-Fi (1 day before travel).

5 Before Boarding

Your phone now has two SIMs.

6 Arrive in Singapore

Your phone detects the local network from the eSIM.

Method 1 : Automatic Country SIM Switching (If Supported)

If your phone supports automatic network selection and the eSIM is enabled, it can connect automatically when you arrive at the destination.

1 Arrive at Destination

Your phone detects the Singapore network automatically.

2 Automatic Prompt (Example: iPhone)

Your phone may show a prompt to activate the travel eSIM. (Takes one tap)

3 Connected Automatically

The travel eSIM connects to a supported local network and starts providing mobile data.

Method 2 : Manual Selection (If Automatic Switch Not Available)

If your phone does not switch automatically, you can manually enable the eSIM and select it for mobile data in a few steps.

1 Open Settings

Go to Mobile Data / SIM Manager in your phone settings.

2 Enable Travel eSIM

Turn on the Singapore eSIM.

3 Select for Mobile Data

Choose the Singapore eSIM for mobile data and enable data roaming (if required).

4 Connected

Complete Journey Flow (Example: India → Singapore)

1 Day Before Travel (Nov 9)
- Open Zylo website
- Select Singapore + travel dates
- Choose and purchase eSIM
- Receive QR code and instructions

Install eSIM (Nov 9)
- Install eSIM using Wi-Fi
- Keep Indian SIM active
- Follow installation guide

Travel Day (Nov 10)
- eSIM is installed and ready
- Board your flight
- No need to change physical SIM

Arrive in Singapore (Nov 10)
- Automatic connection (if supported) OR manual selection (3 simple steps)
- Phone connects to local network

During Your Trip (Nov 10 – Nov 15)
- Use high-speed internet
- Keep your Indian number (for calls/SMS, subject to roaming settings)
- Check data usage in Zylo dashboard
